EMARK STYLE is a company founded by a group of qualified professionals, with more than 15 years of experience, specializing in the commercialization of construction materials for residential, commercial and industrial projects.

Additionally, we are a company that strives to provide our clients with differentiating factors such as style, innovation and superior quality. In this manner we can achieve a prime position in the market that allows us to contribute to the architectural ecosystem all the latest trends and cumulative knowledge of the Industry.

We count with the representation of leading Brands in the Porcelain, Bathroom, Kitchen, Faucet and wood flooring industry; which provide us with a wide array of choices of up to 10,000 models which allows us to find the perfect identity for each space.

EMARK STYLE “A space for each life”

SERVICES

- ARCHITECTURAL DESIGN
- MANAGEMENT AND EXECUTION OF THE PROJECT
- DESIGN AND STRUCTURAL CALCULATION
- CONDITIONING OF AREAS
- FOUNDATION DESIGN AND DEVELOPMENT

In EMARK STYLE we believe that constant innovation, not only transforms spaces, but also lives. This is why we work tirelessly in combining the latest design trends and technology in our products. In this way striving to go beyond the established norms in order to provide our clients with an environment in which ideas and possibilities are limitless.

In this manner we look to grow with our clients, which is something that gives us immense pride.

Berek®

TRENTO®

Kropel®

OUR BRANDS

Berek

BerekSince 1890, BEREK has been a leading company in the United Kingdom market. Creating modern and functional designs in the Sanitaryware market.Winner of the Lloyd's England award, through the years the company has compiled an ample portfolio which is integrated into its philosophy which is to create feelings with its products.

Trento

TRENTO is of Austrian origins, this specialized brand in floorings of all types: Porcelain, Ceramic, Wooden laminate, possesses one of the largest production lines in the world, this way it allows us to commercialize all types of flooring options that perfects the design plans and optimize the profitability of the projects.Each of its collections has its unique seal of inspiration and evolution, incorporating into its production relevant cultural aspects that improve its color pallet and texture.

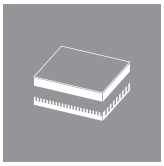
Kropel

KROPEL has its origins in Germany, leader in solutions for the conduction of water with its portfolio of Faucets and Accessories. All its series integrate functionality, design, quality and excellent price, adding to it the undeniable fingerprint of German production.

FLOORING

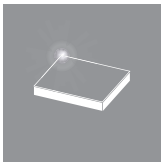
FEATURES:

The following conventions correspond to characteristics and/or properties of some of our products.



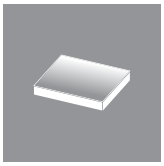
RECTIFIED

Finishes in which the edges have a straight cut on the edge, which allows for less expansion and/or dilation between the tiles.



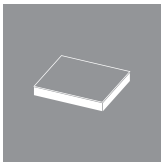
POLISHED/SOLUBLE SALTS

Combination of natural mineral materials, resistant to abrasion, absorption and resistance. Ideal for its shiny polish.



SEMIPOLISHED

The glossing technique on the tiles in which a semi-polished finished is applied giving it a semi-glossy finish.



MATT

Tile finishing with any type of polishing, generating a high level of protection, easy to maintain and with a desired finished and natural aspect.

ASSEMBLY

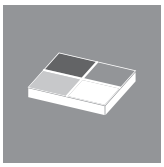
Assembly pieces are characterized by jagged edges that pair together when installed.

STAIN RESISTANCE

The product contains a special layer that covers the surface of the porcelain tiled, which prevents liquid absorption.

ANTI-SLIP

A protective layer for Porcelain and Ceramic flooring which provides greater safety.



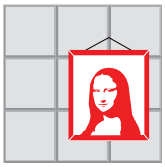
CHROMATIC

Existing degree of variation of the pieces such as color and surface, since they are materials with different material composition.

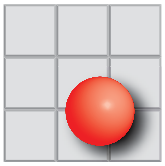
HIGH TRAFFIC

The amount of traffic in a space which is resistant to abrasion and moisture; recommended for commercial and outdoors with high people traffic and high absorption rates.

APPLICATIONS



WALL:
Tiles in Porcelain, ceramic and wood designed for wall application and installation.



FLOOR
Porcelain, Ceramic and Wooden tiles designed exclusively for covering of flooring zones.

RB (low resistance)

RM (medium resistance)

RA (high resistance)

ACB (commercial basic)

ACM (commercial medium)

ACA (commercial high)

Width of tiles

TRENTO®

These are products designed with high engineering standards that comply with all the quality standard and norms such as CE European Conformity Certification.

Flooring tiles are elements that serve the purpose of generating modern and stylish living spaces that soothe the senses and generate quality of life for those who inhabit them.

CERAMICS

CERAMIC

It's a mixture of different components that create realism in its environments. Its rectified edges provide a touch of elegance and minimalism that go hand in hand with all styles.

WOOD, LAMINATE AND PVC FLOORING

WOOD, LAMINATE AND PVC FLOORING

In our lines of laminated, solid and PVC wood flooring, one of the most important factors is the definition of the surfaces, which are made with top quality wood and materials. For this reason, the treatment given to the wood has modern techniques and is environmentally friendly.

BATHROOM

FAUCETS

Kropel®

Its creation is born out of the necessity to improve and provide functionality to spaces in which Faucets play a key role. Therefore, it's important to elevate and provide solutions to the correct management of water. All of its components are designed with certified precision by organizations that help to improve quality of life and optimize natural resources.

FAUCETS

FAUCETS

Our faucets are manufactured based on the experiences of millions of users who have clearly identified their necessities with concerns to their interface with water in the bathroom.

SHOWERS

SHOWER FAUCETS

Shower faucets are a key component to the bathroom which inspire with their design and functionality all the requirements and aesthetic preferences of users.For this reason, it's imperative that our shower faucets are designed with modern and delicate designs that stand the test of time.

BATHROOM FURNITURE

BATHROOM FURNITURE

It's a style that equates to modernism, in which aesthetics, the fruits of the artists inspiration, and the commitment to evolving and breaking with tradition are of paramount importance.

Our furniture is committed to creating something new whilst keeping the best feature of the past. This tendency creates a sensation of alternatives and transcendences without pretensions. Design is the fundamental piece, accompanied by a variety of materials that can be mixed to give birth to art made furniture.

PORCELAIN SANITARYWARE

Berek

NOur porcelain sanitaryware is the result of a mixture of factors that allows us to innovate not only in the outline, but also to make its mechanisms more efficient with minimal consumption, incorporating new engineering techniques that facilitate that both the design and water savings are integrated into one.

TOILETS

TOILETS

The organic style, also called “organicism”, was born in the United States around 1940 when there was a crisis of rationalism, although it accepts many of the technical solutions provided by it.

Our toilets go hand in hand with designs that promotes harmony between the human habitat and the natural world. Through this plan, it seeks to understand and integrate with the site, the buildings, furnishings, and the surroundings so that they become part of a unified and correlated composition. This style looks for sanitary porcelain to join with natural light, recycled materials and decorative elements that create a new, relaxed and comfortable space to enjoy.

BATHTUBS

BATHTUBS

Making the bathroom a fun moment and if we add a work of art to this event, it would be the perfect complement to enjoy an experience that transforms us. The creation of figures that begin in drawing and end in the materialization of a product can only be achieved thanks to the human talent that we possess.

The forms of great design that our bathtubs have allow comfort to be the most important thing inside, with the same precision on the outside, generating a language of elegance for all bathrooms.

ESBT-0004

ESBT-0005

ESBT-0006

The elemental geometry of the surface of the tubs seems to be transformed by waves and subtle waves, but evident below the surface, while the complements of it seem to overturn from the horizontal an intense spiral of water.

KITCHENS

KITCHENS

The notion of kitchens also allows us to refer to gastronomic art, which allows us to create designs that evoke all world cultures, matching each one of the needs and demands of our clients.

All the components of our kitchens are designed with international standards, for this reason operation and precision are the key to completing a masterpiece.

KITCHENS

The idea of giving prominence to the kitchen is key for a project to stand out, the works reveal the architectural form, expressing the power of traditional, modern functional, postmodern and nostalgic buildings.The concept that develops the kitchen space is vital in any design. Ordered from modernism and postmodernism, the desire of architecture to generate new ideas followed by a complete decoration concept.

KITCHENS

Rare and iconic are the designs that today's architects and designers achieve. This work is the unique experimental combination that generate relevant trends.

COUNTERTOPS

COUNTERTOPS

Countertops are a combination that incorporates a strong accuracy in its cuts, it is the perfect complement that most marks the style of a kitchen.

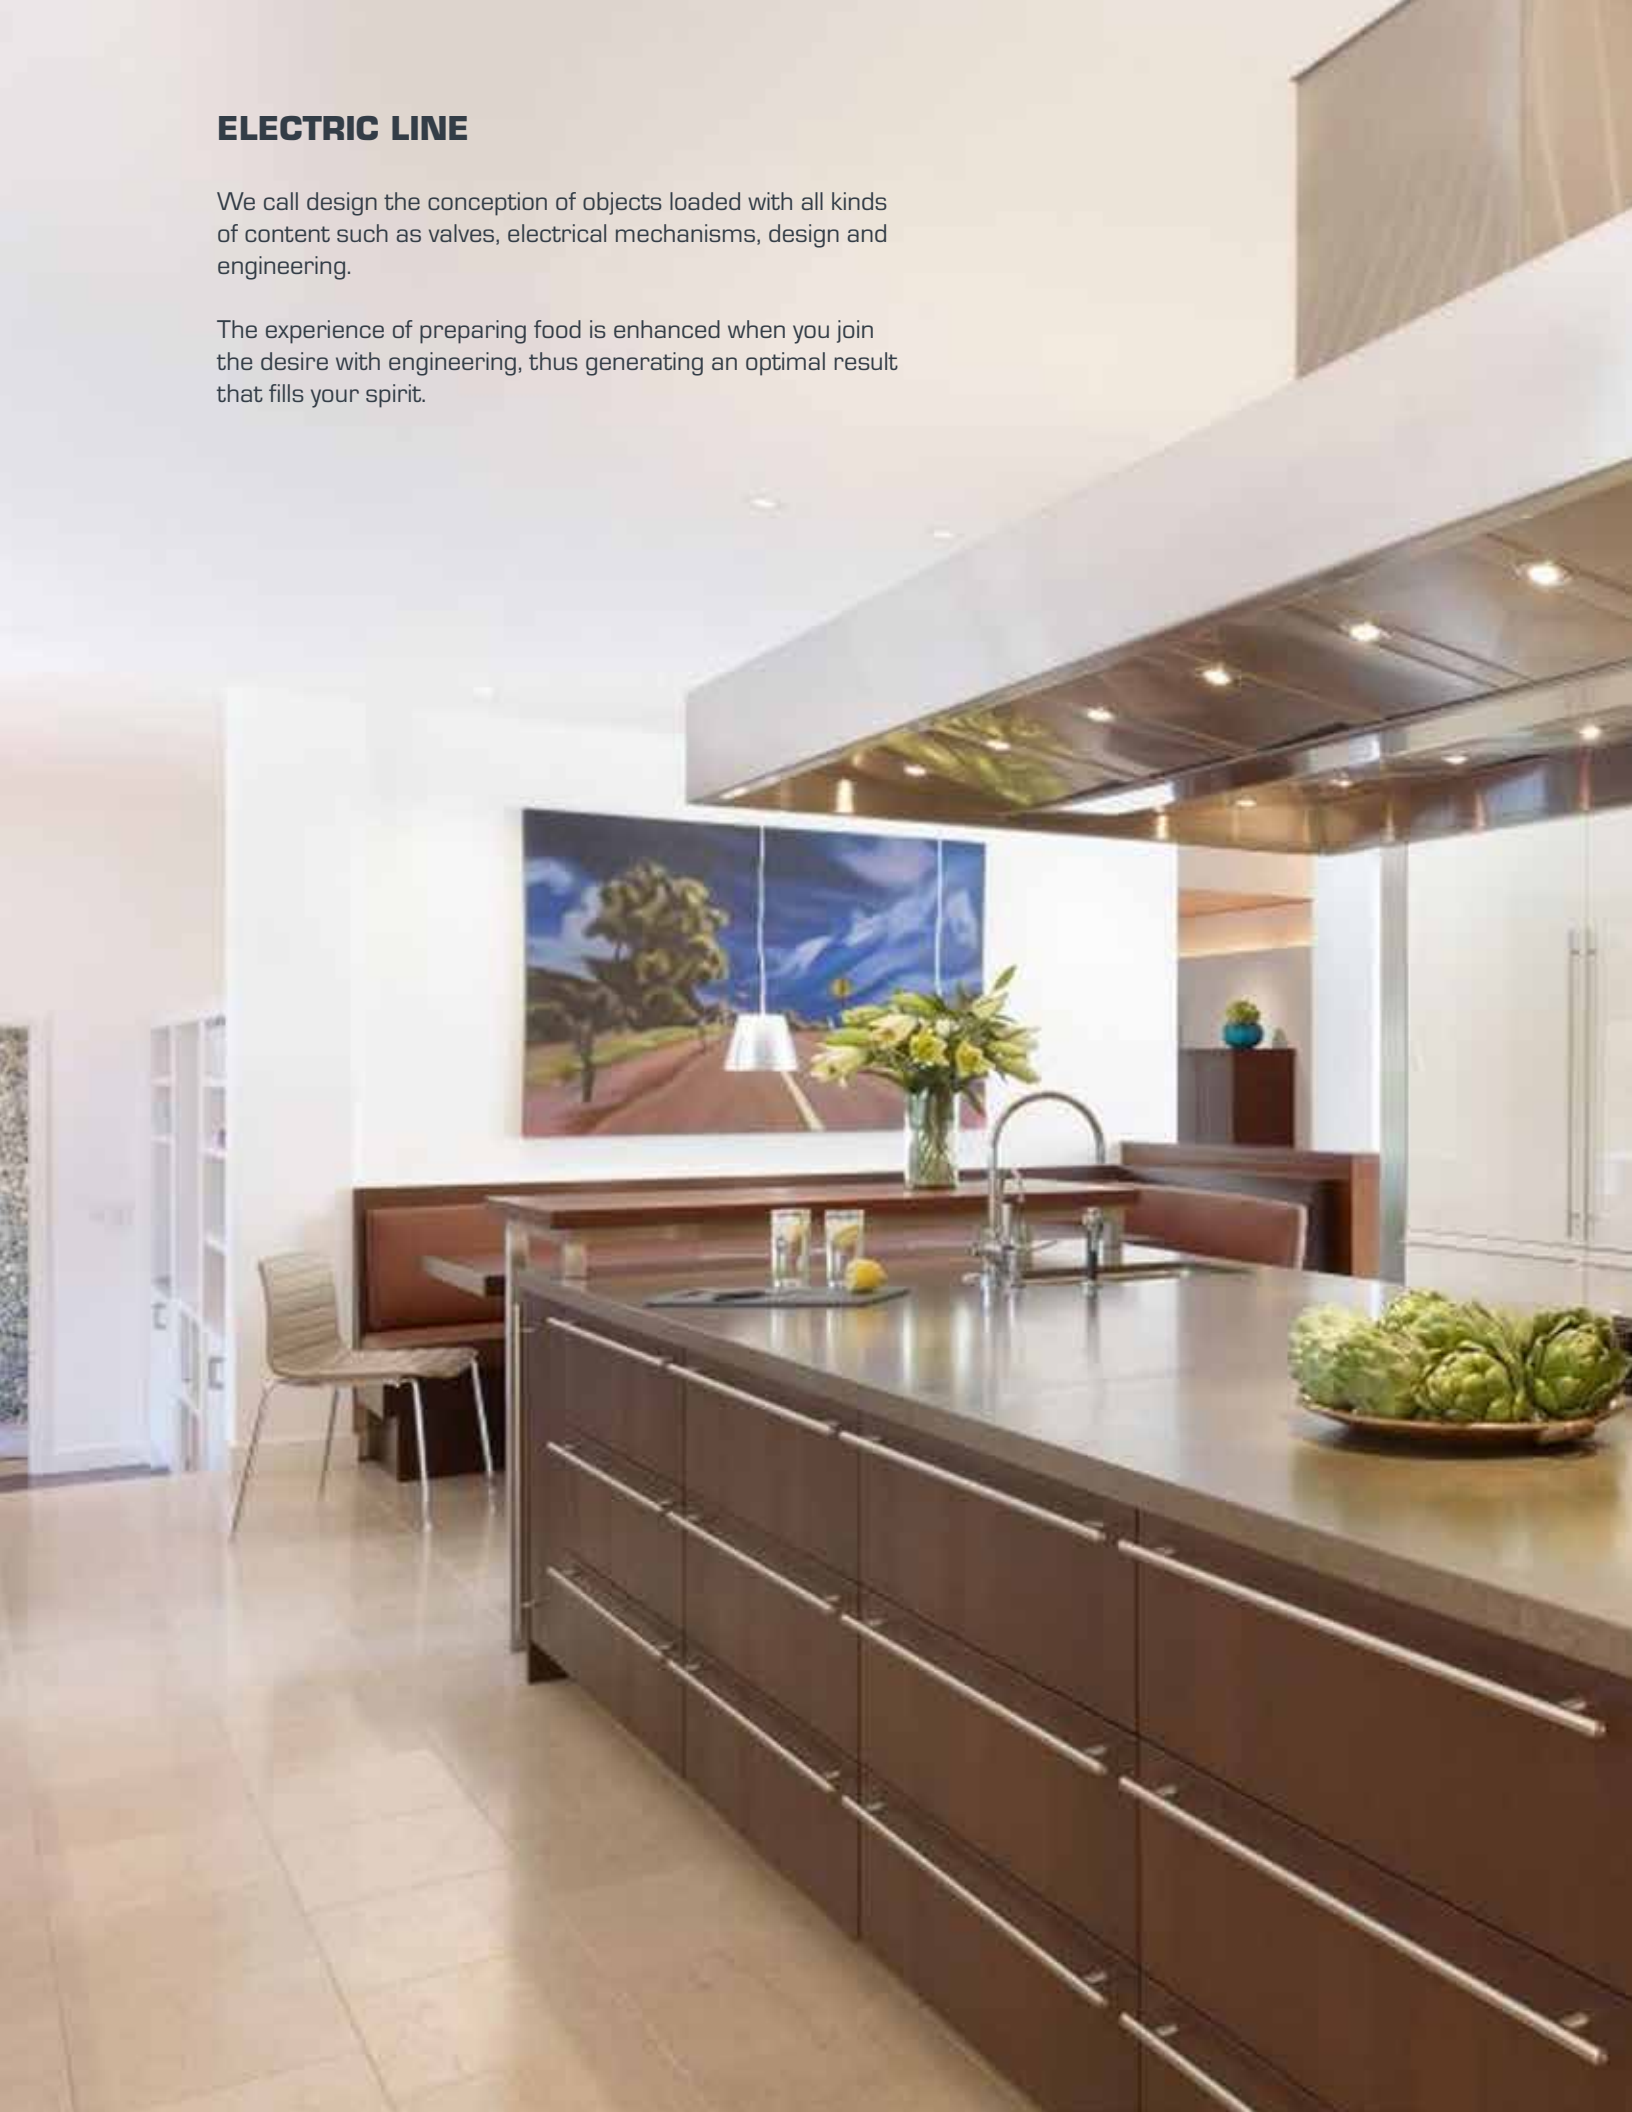
ELECTRIC LINE

ELECTRIC LINE

We call design the conception of objects loaded with all kinds of content such as valves, electrical mechanisms, design and engineering.

The experience of preparing food is enhanced when you join the desire with engineering, thus generating an optimal result that fills your spirit.



RANGE HOODS

RANGE HOODS

Industrial production generates a high differentiation of components, which come together to make life easier. The Range hoods are an important complement to the kitchen, for this reason, they must be treated as an art form in itself.

STOVE TOPS

STOVE TOPS

The word Stove top has its origin in functionality, which infers today in their design, generating not only functionality but also a very high standard of precision and design giving a name to something like the top or stove, shows us that, in all cultures, its evolution has been significant.Nowadays, design is defined as innovation, being able to find a solution in any field, whether in industry, engineering or architecture, is possible with our stove tops.

OVENS

OVENS

With the ovens it will be possible to reach an aesthetic and at the same time functional design, the design carries with it issues such as technology, presentation, among others. And it is in this way that we can become leaders in the manufacture of our ovens, as a set of steps to reach a final product, aesthetic, but above all functional.

CARPENTRY

CARPENTRY

Although it is true that we find many carpentry options, with styles according to their culture, we have managed to generate designs that help highlight world architecture.We seek to share information that helps every project to find its identity which will be marked by wood, therefore we are constantly studying and improving quality so that wood generates warm environments.

DOORS

DOORS

Regardless of the style of the doors, or that you have chosen as your favorite, we can agree on something, all of them have had a great contribution in the history of architecture and each one of them leaves at least one iconic feature, which represents the great work of its designers and keeps them current despite the years.

CLOSETS

CLOSETS

Something that we cannot forget is that the originality of the closets was due to the fact that, among other things, mass production did not exist, its beginning was a trunk and with the dedication of the designers which is generated with the revolution and the replacement is born the trend, thus managing to produce more and better closets by making use of technology.
